

## Assembling missing emergency pulling.

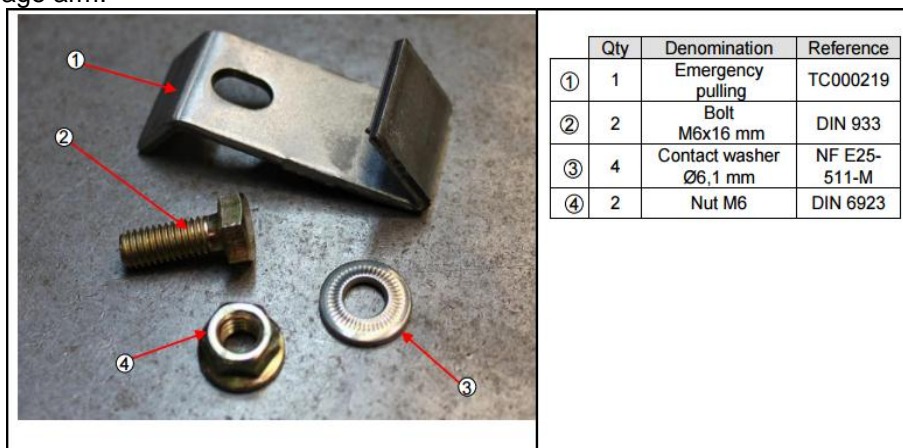

Edition Date: 13/03/17

Edition: Piotr Miechoński

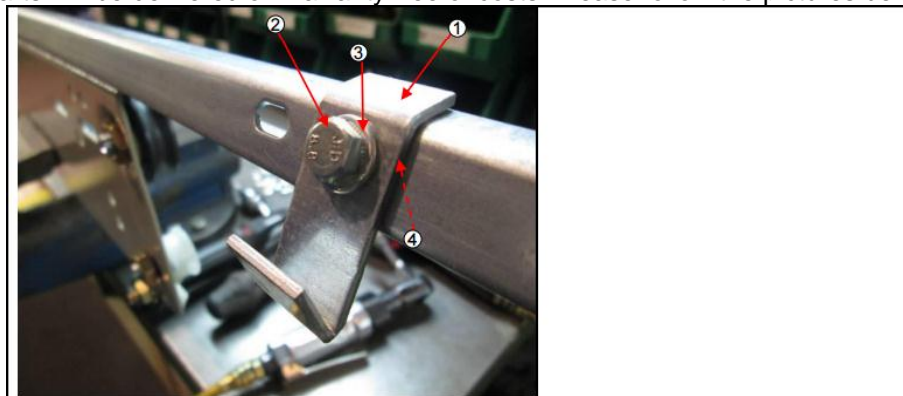

Assembling of missing emergency pulling support can be fixed on already installed landing doors. To make easier please loosen or unscrew panel from the carriage.

It will be easier to increase distance between mechanism base and carriage arm – pull a little bit arm to put nut behind the carriage arm.

All necessary parts will be delivered on warranty free of costs. Please follow the pictures below :
